Emergency Distress Button (Model: AS-EDB-P)

The Emergency Distress Button is specially designed for Persons with Disabilities in mind.

This button is usually placed in Toilet cubicle at a convenient height and location so that a Persons With Disabilities can have easy access to it and activate it by pressing the button when call for help is needed.

The Emergency Distress Button can be either used as a Standalone System to sound a local Siren / Strobe light or used with a Monitoring Panel which is usually monitored by the building security personnel.
