Handicap Toilet Emergency Alert System (Standalone)

The Handicap Toilet Emergency Alert System is specially designed for Persons With Disabilities and Senior Citizens that require immediate assistance while in a public toilets.

The system consists of a waterproof emergency button, usually placed in a toilet cubicle at a convenient height and location so that it is easily accessible when in need. A Siren cum Strobe light will also be installed outside the toilet entrance at high level.

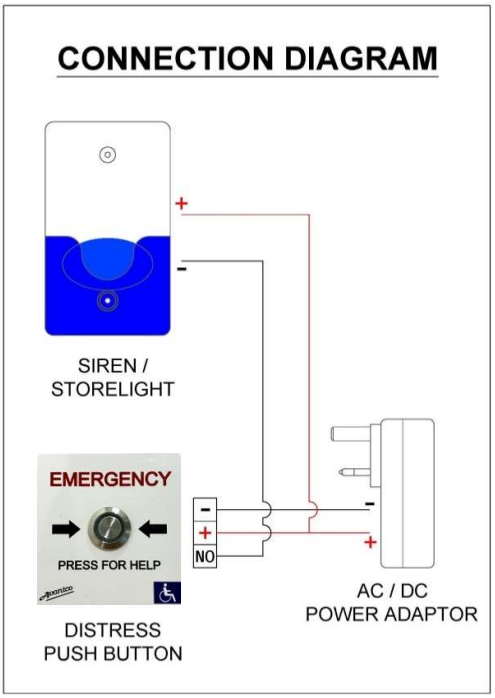

To activate the alert system, simply pressed the round button and a bright RED LED around the button will lights up and Siren cum Strobe light will then sound a loud 120dBA siren with flashing blue strobe lights to alert the building maintenance or security personnel or anyone within the vicinity that help is needed.

Features: -

- Standalone design
- Button is robust and waterproof with LED
- Loud siren and bright strobe light
- Simple installation and easy operation
- Low maintenance
