DISTRESS ALERT SYSTEM
FOR PERSON WITH DISABILTY (PWD) HOLDING POINTS

TYPICAL 8 ZONE PWD DISTRESS ALERT PANEL

The Vanguard V5-PWD Distress Alert System provides Persons With Disabilities (PWD) a means to call for assistance from the PWD holding point to a 24 hour manned centre or FCC via the Distress Alert Station.

By pressing the button on the Distress Alert Station, the LED at the Alert Station will flash. A buzzer in the PWD Alert Panel (located in a 24 hour manned station or FCC) will sound together with a lit LED identifying the location of the incoming Distress Alert Station. When the "buzzer silence" button on the PWD Alert Panel has been pressed, the panel alarm buzzer will silence. The flashing LED at the Distress Alert Station will then be continuously lit to notify the caller that the call has been received and help is forthcoming.

The system is reset by pressing the button again on the Distress Alert Station, the panel indicator light will then reset on its own accordingly .

Technical Specifications			
PWD Distress Alert Panel		PWD Distress Alert Station With Weatherpoof Box	
Model No:	V5-PWD-AP-ACK	Model:	AS-EDBW
Capacity:	4 Zone and above	Size:	80 x 80 x 60 mm (h x w x d)
Indicator Type:	LED Type	Material:	ABS Poly Carbonate
Power Supply:	230VAC	Current / IP Rating of button:	3A / IP 67
Operating voltage:	12VDC	Call Received Indication	Yes
Battery Backup:	7AH	PWD Distress Alert Station With Faceplate	
Control Switches:	Lamp Test, Buzzer Silence	Model:	AS-EDB-P
Buzzer resound:	New incoming call resounds buzzer	Size:	86 x 90 x 55 mm (h x w x d)
Housing Colour:	Green	Current / IP Rating of button:	3A / IP 67
Housing Material:	Steel 18AWG	Call Received Indication	Yes
